## Knot Display board

### 20 points

Charlotte had to learn how to tie various knots to work in the sails and riggings. Using reference materials, learn to identify and tie different kinds of knots. Using a piece of nylon or synthetic rope, create a board on which you demonstrate and label 5 knots from the following list:

Angler knot, barrel knot, Blackwall hitch, bowline, carrick bend, cat's paw, clove hitch, eye splice, figure-eight knot, fisherman's bend, granny knot, half hitch, lark's head, magnus hitch, overhand knot, overhand loop, reef knot, rolling hitch, seizing, sheet bend, slip knot, square knot, stevedore knot, timber hitch, two half hitches, whipping

On a separate piece of paper, explain when and where each knot would be used.

	4	3	2	1
<b>Knots</b>	5 knots are tied correctly.	4 knots are tied correctly	3 knots are tied correctly	2 knots are tied correctly
<b>Identification</b>	All knots are correctly identified	1 knot is misidentified.	2 knots are misidentified.	3 knots are misidentified.
<b>Display</b>	Knots are very neatly displayed and labeled.	Knots are neatly displayed and labeled.	Knots are displayed and labeled.	Knots are not neatly displayed or labeled.
<b>Informational sheet</b>	Informational sheet is typed using correct grammar, spelling, and usage.	Informational sheet is typed with 1-2 errors in grammar, spelling, and/or usage.	Informational sheet is typed with 3-4 errors in grammar, spelling, and/or usage.	Informational sheet is typed with 5-7 errors in grammar, spelling, and/or usage.
<b>Uses</b>	Explanation of when and where each knot would be used.	Missing explanation of when and where 1 knots would be used.	Missing explanation of when and where 2 knots would be used.	Missing explanation of when and where 3 knots would be used.
